

MX Logic® About MX Logic

Spam now accounts for more than 80% of all email traffic.

MX LOGIC® THREAT CENTER

More than 55% of PCs are infected with some form of spyware.

SANS INSTITUTE

30-40% of Internet browsing is non-job related.

IDC RESEARCH

Businesses that rely on the Internet need around-the-clock protection from today's quickly-evolving online threats – from spam and viruses to spyware and fraudulent phishing attacks. Unfortunately, many businesses do not have the IT resources or expertise necessary to manage and maintain effective online security solutions.

That's why businesses, state and local governments, and educational institutions worldwide trust MX Logic to protect their networks against converging email and Web threats with our effective, reliable solutions, which are easy to administer and use, and help organizations to:

- Reduce business disruption
- Safeguard the integrity of business communications
- Increase employee productivity
- Lower IT costs associated with Web and email threat management

AWARD-WINNING MANAGED SECURITY SERVICES PROVIDER

Headquartered in Englewood, Colo., MX Logic is a leading managed security services provider of email and Web security services. MX Logic's patented technology and commitment to creating the most user-friendly security solutions in the industry make MX Logic the appropriate choice for businesses that want enterprise-grade service and performance without enterprise-level complexity and cost.

MX Logic's distinctions include earning the Security Products Guide's *Global Excellence Customer Trust Award in Email Managed Service* and the 2006 SC Magazine Award as the *Best Email Managed Service*.

MX LOGIC EMAIL AND WEB SECURITY SERVICES

All MX Logic online security services offer easy administration and use, are backed by industry-leading threat expertise, and are highly effective in protecting businesses from a wide range of email and Web threats. Our suite of disaster recovery services help businesses manage their important email communications during outages. In addition, MX LogicSM Message Archiving protects businesses that are required to monitor, store and retrieve company email messages in order to comply with electronic security regulations. With services provided through our extensive partner network, businesses like EnCana, Hyundai Motor America, Internet Initiative Japan, ServiceMaster, Verio Inc., and YMCA maintain healthy networks today through MX Logic's automated and flexible email and Web threat protection.

MESSAGING AND SECURITY PIONEERS ESTABLISH MX LOGIC

CEO John Street and CTO Scott Chasin introduced the first Web-based email service to the Internet in 1995. Less than a year later, they released the first commercial-based managed messaging service, which grew to over 30 million customers and millions of messages a day and brought to light an escalating problem: email networks were under constant attack from spam and viruses.

HIGHLIGHTS

- Award-winning service
- Filtering billions of messages a month for over 17,000 customers
- Comprehensive Web and email defense
- Founded by messaging and security pioneers
- State-of-the-art Threat Center provides around-the-clock protection
- Robust and flexible technology platform

The best defense is a good offense

Filtering billions of messages a month for over 17,000 customers, MX Logic takes email protection and Web defense to a new level. We provide a complete network-edge defense that is customizable, requires no additional hardware or software, integration or migration, and can be implemented rapidly and effortlessly.

MX Logic® Email Defense Service

Our managed email security service offers comprehensive protection against a wide range of email threats using a combination of proven spam filters, leading anti-virus engines, fraud protection, content filtering, and email attack protection.

MX Logic™ Web Defense Service

Our easy-to-use Web security solution effectively blocks quickly-evolving Web threats, including spyware, viruses and phishing attacks, while enabling greater control over unauthorized Web surfing by employees.

MX Logic™ Disaster Recovery Services

Available with the MX Logic Email Defense Service, our disaster recovery services provide email communications continuity for businesses in the event of planned or unplanned outages.

MX Logic™ Message Archiving

A scalable, easy-to-use managed service solution, MX Logic Message Archiving provides businesses the oversight they need to minimize the costs and risks associated with non-compliance, loss of proprietary information, and inappropriate employee emails.

A HISTORY OF MANAGED SECURITY INNOVATION

Founded by messaging industry pioneers, MX Logic has delivered numerous industry firsts to the email defense market, including becoming the first managed service provider to:

- Leverage Bayesian Statistical Classification
- Provide spam beacon ("Web bug") blocking
- Offer quarantine management via email
- Provide corporate-level quarantine release reports that help reduce inappropriate email while decreasing corporate liability
- Deliver a solution for tracking URL click-throughs from email to the Web, providing increased corporate control and security

THE MX LOGIC® THREAT CENTER INTEGRATES HUMAN INTELLIGENCE WITH TECHNOLOGY

Powering our online security solutions is the MX Logic® Threat Center where our experienced security experts monitor the global state of email and Web traffic around the clock to provide customers with real-time updates and protection. The Threat Center provides dynamic defense by staying far ahead of the next attack by continually incorporating information about the very latest spammer, virus and worm tactics.

CONTINUALLY-UPDATED, LAYERED PROTECTION

Working behind the scenes to block threats at the network perimeter, the multi-layered technologies that power MX Logic email and Web security solutions complement and fortify your existing network and desktop security solutions to provide maximum protection against a wide range of quickly-evolving threats. As new threats emerge, new solutions developed by MX Logic or one of our industry-leading technology partners can be quickly put into place to defend our customers.

Find out more about how MX Logic is making it easier for businesses to increase online security and decrease the waste associated with spam, viruses and worms, and other Web-based threats by calling 1.877.MXLOGIC or visiting us at www.mxlogic.com.
