

MX LogicSM Web Defense Service-Threat Control

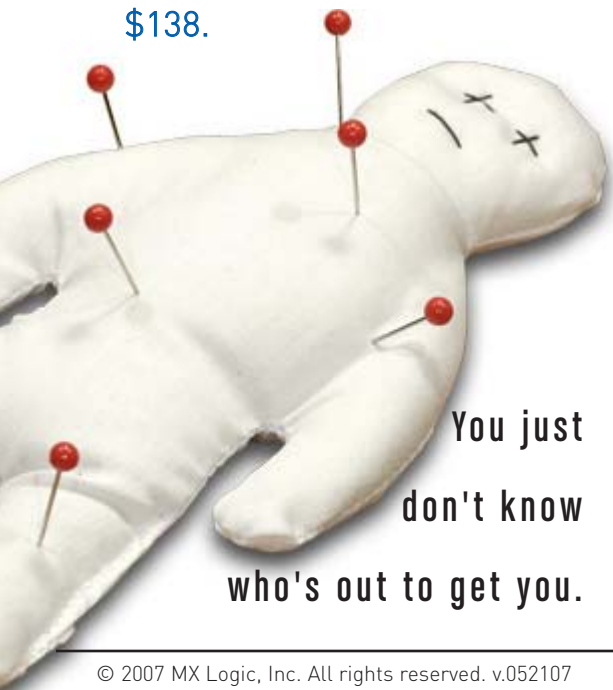

44% of organizations have reported network intrusions from within their own organizations.

FBI COMPUTER CRIME SURVEY

More than 55% of PCs are infected with some form of spyware.

SANS INSTITUTE

Industry experts calculate that the cost per incident to remove spyware from just one employee's desktop is approximately \$138.

You just
don't know
who's out to get you.

Access to the Internet enables businesses to work more collaboratively and more efficiently than ever before. Unfortunately, without a Web security service like the MX LogicSM Web Defense Service, the Internet can also be a dangerous gateway into your business for spyware, viruses, worms and other malicious threats.

MX LogicSM Web Defense Service – Threat Control, is designed to help organizations easily and effectively protect employees and network assets from Web-based threats, increasing overall security and reducing the costs associated with infection.

WEB-BASED THREATS ON THE RISE

Dangerous web-based threats make businesses vulnerable to debilitating infection and putting unsuspecting users at risk. And, these risks are growing.

- There are now over 527,000 malicious websites in existence
- 90 percent of businesses suffered hacker attacks in the last year
- 44 percent of organizations have reported network intrusions from within their own organizations

HOW THREAT CONTROL CAN HELP YOUR BUSINESS INCREASE WEB SECURITY

At the foundation of our fully-managed MX Logic Web Defense Service, Threat Control offers reliable, effective support for network administrators and small business support staff. With MX Logic, it's easy and economical to maintain an effective web security solution.

- Reduce IT costs related to bandwidth and maintenance
- Reduce the risk of business disruption by reducing threat of PC infection
- Protect employees from fraud and the company from IP theft and compliance violations
- Ease burden on IT staff through flexible, scalable, continually-updated service

ELIMINATING WEB-THREATS HAS NEVER BEEN EASIER, MORE EFFECTIVE

Unlike complicated web security appliances, Threat Control is easy and intuitive, and our security experts monitor Web activity around-the-clock so you can concentrate on core business operations. It can be activated in as soon as one business day, requires minimal on-going administration, and immediately begins providing up-to-the-minute protection from Web threats. Other benefits include:

- Convenient month-to-month contract terms
- No hardware or software to integrate
- Easy administration through the MX Control ConsoleSM, our Web-based administrative portal
- Flexibility and scalability to grow with your business

PUTTING THE POWER BACK INTO THE HANDS OF THE BUSINESS

MX Logic Web Defense Service – Threat Control offers enterprise-class protection without the enterprise-level cost. Integrating around-the-clock protection against spyware, viruses and phishing attacks, Threat Control also offers:

- User- and IP-level authentication
- Group policies management
- Threat, traffic and usage reports
- Automatic web threat updates
- Anti-virus protection provided by Kaspersky
- Convenient training classes and Online Help
- 24x7 Customer Support

For total network protection using a layered strategy, businesses can combine Threat Control with the MX Logic Web Defense Service – Content Control. Find out how you can leave the threat management to us and enjoy a safer, more secure network and business environment by calling 1.877.MXLOGIC or visiting us at www.mxlogic.com.
